

Language Arts

Minutes from Early Release.3/9/16

Teachers present: Emily Feehery, Jim Goodspeed, Jeremy Hyler

We discussed common language within our department and started a Google Document. We discussed the idea that there may be language that is going to be different between elementary and middle school and middle school to high school. It would be our job as teachers to help transition any difference in language.

We also discussed what are possible ways to help students prepare more for high school with different assignments in the middle school. Also, what were the general focuses in each grade level when it came to high school.
