

# Technology Meeting Minutes

November 12, 2015

## Attendees

---

Cari Smith, Jeremy Winsor, Kevin Sherrick, Graham Salogar, & Penny Bearden

## Agenda

---

### New Business

\*Explore Illuminate Database and Question Bank options for creating and recording assessments and student progress.

### Old Business

- Individual Teacher progress and 2nd Semester plans

## Old Business

---

- Personal progress by teachers was discussed.
- Individual teachers discussed plans for pre and post testing scores and assessment construction based on uploaded materials and availability for each content area.

## New Business

---

- Discussed individual progress to date and how people had already utilized the program
- Behavior logs were the primary use to date by all attendees
- We talked informally about questions and concerns we all had. Each of us had different “problems” and issues based on our different content areas. Science was waiting for their question banks to align to the new science standards. Math had more than 400 questions to sort through in order to create a 40 question assessment. Technology had no question banks nor category options existing at this time. Special Ed students each possess individual needs and creating generic assessments for grade levels would be based on individual needs and would be an on going issue.
- We each looked at general ways to enter pre and post test scores as a starter for second semester. We all knew we would benefit from Heidi Aldrich’s in house visit and PD scheduled for Monday November 16, 2015. We all were formulating our own personal questions based on our individual needs, curriculum, and content areas.

- Mr. Schoensee stopped by to check on our progress and shared some basic construction tips for setting up helpful starting templates for each of us.

## **Next Meeting**

---

Dec 9, 2015 at 2:00 p.m.

---

## **Adjournment**

---

Adjourned at 3:15 p.m.
