

Technology Meeting Minutes

March 9, 2016

Members

Holly Malek & Penny Bearden

Agenda

New Business

- Discussed and compared Terminology used within our curriculum
- Upcoming Testing Dates/Computer Usage
- MACUL Conference Attendance

Old Business

- Discussion of Curriculum Maps and Terminology used in course. We compared things we had in common from Middle School across the curriculum to High School.

Old Business

- Mr. Hungerford has asked groups to compare their curriculum maps and key terms used within their courses. It was evident that most general technology terms introduced in the Middle School continued on for High School courses. However business specific courses and accounting courses were different and had their own key words and terminology. Usage of some programs crossed over between introduction usage in the Middle School and then advanced usage and more in-depth use at the High School.

New Business

- Again discussed pacing guides and usefulness of those this year and how on target we were and adjustments being made for next year based on our experiences this year.
- Due to District Wide Spring testing, Pat is again working to prepare lab and laptop computers to have them ready for testing.
- Mrs. Malek will be attending March 10 & 11 MACUL conference. She will report back on sessions she attended and information she found helpful and useful for future technology lessons and support for the district.

Next Meeting

To be determined

Next Meeting Agenda Items

- Debriefing on Curriculum Maps and Pacing Guides
- Contact Pat to see if we can get some training associated with the remote program for controlling student monitors to assist with student activity and instruction.

Adjournment

Adjourned at 3:00 p.m.
